

## Windrose Software Installation Procedure

1. Create an empty folder “Wind Rose” in “D” drive. We will use this folder to Install Windrose Software because if we will install the software in default path C->Program Files there may be some administrative right problem or security issue.
2. Click on the **setup.exe** file in the folder **Windrose Software Setup**. The Windrose Software Setup Screen will be displayed as follows.

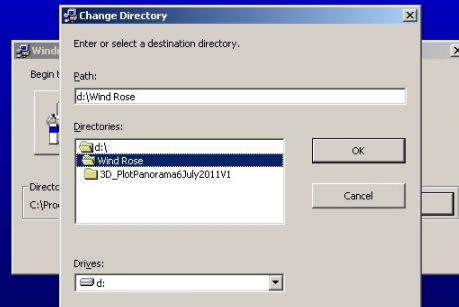

3. Click on the **Ok** button. The next window will be displayed as follows

## ***Windrose Software Setup***

4. Click on **Change Directory** button. The next window will be displayed as follows.

## *Windrose Software Setup*

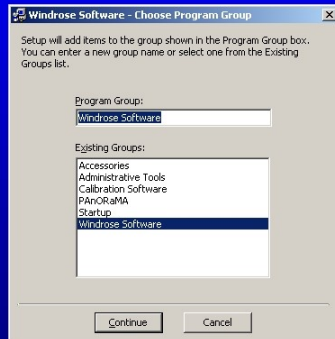

5. Select “**d**” drive from Drive dropdown box then click on “Wind Rose” folder in Directories listbox. After clicking on **OK** button the next screen will be displayed as follows.

## ***Windrose Software Setup***

6. Click on Install button (Displayed with Install Icon) below the label “Begin the installation by clicking the button below”. The next window will be displayed as follows.

## Windrose Software Setup

7. Click on the **Continue** button. The next window will be displayed as follows.

## ***Windrose Software Setup***

8.If you will get any error message during installation process then click on Ignore button.
